About the job

Company Description

Qidni Labs Inc. is a clinical stage medical device company focused on innovating dialysis technology for kidney failure patients. Based in Kitchener, ON, our mission is to eliminate the infrastructure barriers that currently limit dialysis availability and reach millions more patients.

Role Description

This is a full-time on-site role for an Experimental Physicist / Chemist – Advanced Energy & Materials Research at Qidni Labs, located in Kitchener, ON. The role involves day-to-day tasks including developing and optimizing materials for dialysis technology, conducting experiments, analyzing data, and contributing to research and development projects. The candidate will work closely with the R&D team to ensure the effectiveness and reliability of the dialysis systems being developed.

Qualifications

- Strong background in Physics, Chemistry, Material Science, or related field
- Experience in Research and Development (R&D)
- Excellent analytical and problem-solving skills
- Ability to work collaboratively in a team environment
- Strong communication skills, both written and verbal

- Strong communication skills, both written and verbal
- Ph.D. or Master's degree in Physics, Chemistry, Material Science, or related field
- Experience in the medical device industry is a plus
